THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CXI

January-December 2007

Subject Index

AERODYNAMICS

A message from the editor. P. Bearman, November pp iv.
A PIV investigation of the characteristics of micro-scale synthetic jets. F. Guo and S. Zhong, pp 509-518.
Computational and experimental investigations of low-Reynolds-number flows past an aerofoil. W. Yuan, M. Khalid, J. Windte, U. Scholz and R. Radespiel, pp 17-29.
Effect of plunging amplitude on the performance of a wind turbine blade section. M.R. Soltani and F. Rasi Marzabadi, pp 571-587.
Flow control with active dimples. S. Dearing, S. Lambert and J. Morrison, pp 705-714.
High performance computing and computational aerodynamics in the UK. D.R. Emerson, A.J. Sunderland, M. Ashworth and K.J. Badcock, pp 125-131.
Investigation on the aerodynamic performance on an ejection seat. D.H. Chen, W.H. Wu, J.J. Wang and Y. Huang, pp 373-380.
Large-eddy simulation of separated flow over a swept wing with approximate near-wall modelling. N. Li and M.A. Leschziner, pp 689-697.
Large-eddy simulation of twin impinging jets in cross-flow. Q. Li, G.J. Page and J.J. McGuirk, pp 195-206.
Parallel adjoint-based optimisation of a blended wing body aircraft with shock control bumps. W.S. Wong, A. Le Moigne and N. Qin, pp 165-174.
Prediction of aerodynamic forces on a helicopter fuselage. A. Filippone, pp 175-184.
Prediction of drag and lift of wings from velocity and vorticity fields. G. Zhu, P.W. Bearman and J.M.R. Graham, pp 699-704.
Remarks on the nonlinear dynamics of a typical aerofoil section in dynamic stall. U. Galvanetto, J. Peirò and C. Chantharasenawong, pp 731-739.
The onset of compressibility effects for aerofoils in ground effect. Technical note, G. Doig, T.J. Barber, E. Leonardi and A.J. Neely, pp 797-806.

AEROSPACE ENGINEERING

New commercial opportunities in space. D.M. Ashford, pp 61-75.
On different parameterisation methods to analyse spacecraft attitude manoeuvres in the presence of attitude constrainsts. G. Radice and M. Casasco, pp 335-342.
Performance characterisation of MPD thrusters. T.R. Nada, pp 443.

AIR TRAFFIC MANAGEMENT

Reducing environmental impacts of aviation with innovative air traffic management technologies. V. Williams, R.B. Noland, A. Majumdar, R. Toumi, W. Ochieng and J. Molloy, pp 741-749.

AIRCRAFT DESIGN

A review of supersonic business jet design issues. H. Smith, pp 761-776.

AIRWORTHINESS

A proposed reference framework for unmanned aerial vehicle and system airworthiness requirements. A. Maneschijn, T. Jones, T.W. von Backström and L.A. Ingham, pp 345-358.

BOOK REVIEWS — BY AUTHOR

Aliabadi, M.H. and Guagliano, M. Fractures and Damage of Composites, p 826.
Anderson, J.D. Hypersonic and High Temperature Gas Dynamics, Second Edition, p 121.
Armstrong, K.B. *et al* Care and Repair of Advanced Composites, Second Edition, p 120.

Spinning Flight: Dynamics of Frisbees, Boomerangs, Samaras and Skipping Stones, R.D. Lorenz, p 122.
Tactical and Strategic Missile Guidance, Fifth Edition, Progress in Aeronautics and Astronautics series Vol 219, P. Zarchan, p 406, 470 .
Tactical Missile Design, Second Edition, E.L. Fleeman, p 119,

COMPOSITES

A study of secondary instabilities in postbuckling composite aerostructures. B.G. Falzon and M. Cerini, pp 715-729.
Analysis of composite plates with variable stiffness using Galerkin Method. E. Senocak and H. Tanriover, pp 247-255.

COMPUTATIONAL FLUID DYNAMICS

Achieving high parallel performance for an unstructured unsteady turbomachinery CFD code. N. Hills, pp 185-193.
An unsteady, moving mesh CFD simulation for Harrier hot-gas ingestion control analysis. A.M. Savill, G.A. Richardson and W.N. Dawes, pp 133-144.
Application of a parallel rotor CFD code on HPCx. C.B. Allen, A.G. Sunderland and R. Johnstone, pp 145-152.
Computational and experimental investigations of low-Reynolds-number flows past an aerofoil. W. Yuan, M. Khalid, J. Windte, U. Scholz, and R. Radespiel, pp 17-29.
High performance computing and computational aerodynamics in the UK. D.R. Emerson, A.J. Sunderland, M. Ashworth and K.J. Badcock, pp 125-131.
The onset of compressibility effects for aerofoils in ground effect. Technical note, G. Doig, T.J. Barber, E. Leonardi and A.J. Neely, pp 797-806.

COMPUTATIONAL TECHNIQUES

A static compressible flow model of synthetic jet actuators. H. Tang and S. Zhong, pp 421-431.
Aircraft cost modelling using the genetic causal technique within a systems engineering approach. R. Curran, S. Castagne, J. Early, M. Price, S. Raghunathan, J. Butterfield and A. Gibson, pp 409-420.
Experimental and computational study of unsteady hypersonic cavity flows. S. Creighton and R. Hillier, pp 673-688.
Flight data reduction methodology for performance evaluation and comparison of model-following adaptive control laws. M.G. Perhinschi and M.R. Napolitano, pp 807-814.
High resolution computational unsteady aerodynamic techniques applied to maneouvering UCAVs. S.A. Morton, R.M. Cummings, J.R. Forsythe and K. Wurtzler, pp 397-404.
Large-eddy simulation of separated flow over a swept wing with approximate near-wall modelling. N. Li and M.A. Leschziner, pp 689-697.
Numerical study of transonic cavity flows using large-eddy and detached-eddy simulation. P. Nayyar, G.N. Barakos and K.J. Badcock, pp 153-164.
Parallel adjoint-based optimisation of a blended wing body aircraft with shock control bumps. W.S. Wong, A. Le Moigne and N. Qin, pp 165-174.
The representation of GT component maps using Mach numbers. V.E. Kyritsis, P. Pilidis and K. Ramsden, pp 453-460.
Three-dimensional indicial response of finite aspect ratio yawed wings. C.E. Manglano-Villamarin and S.T. Shaw, pp 359-371.
Towards a full two dimensional gas turbine performance simulator. V. Pachidis, P. Pilidis, L. Marinai and I. Templalexis, pp 433-442.

DESIGN

Design of fixed wing micro air vehicles. P. Cosyn, pp 315-326.
On the benefits of lower Mach number aircraft cruise. A. Filippone, pp 531-542.

ENVIRONMENTAL ENGINEERING

Lean engineering: a framework for doing the right thing right. H.L. McManus, A. Haggerty and E. Murman, pp 105-114.
A change in the calculated impact of supersonic aircraft NOx emissions on the atmosphere. O. Dessens, H.L. Rogers and J.A. Pyle, pp 311-314.
'Greener' civil aviation using air-to-air refuelling – relating aircraft design efficiency and tanker offload efficiency. R.K. Nangia, pp 589-592.
On the benefits of lower Mach number aircraft cruise. A. Filippone, pp 531-542.
Reducing environmental impacts of aviation with innovative air traffic management technologies. V. Williams, R.B. Noland, A. Majumdar, R. Toumi, W. Ochieng and J. Molloy, pp 741-749.

FLIGHT CONTROL DYNAMICS

Aircraft flight characteristics in conditions of windshear and icing. Y. Cao and K. Yuan, pp 41-49.
Dynamic gain scheduled control of a Hawk scale model. T. Richardson, M. Lowenberg, C. Jones and A. Dubs, pp 461-469.
Estimation of lateral-directional parameters using neural networks based modified delta method. S. Singh and A. K. Ghosh, pp 659-667.
Relationships between flying qualities and flight tests parameters for the F/A-18 aircraft. R.M. Botez and M. Rotaru, pp 281-282.
Some analytical and numerical solutions for the safe turn manoeuvres of agricultural aircraft – an overview. B. Rasuo, pp 593-599.

FLIGHT SIMULATION

Addressing pose estimation issues for machine vision based UAV autonomous aerial refuelling. G, Campa, M.R. Napolitano and M. Perhinschi, pp 389-396.

FLIGHT TEST

Relationships between flying qualities and flight tests parameters for the F/A-18 aircraft. R.M. Botez and M. Rotaru, pp 281-282.

HISTORY

The Victoria University of Manchester's contributions to the development of aeronautics. J.A.D. Ackroyd, pp 473-493.

INDUSTRY

Strategic Destruction of the Western commercial aircraft sector: implications of system integration and international risk-sharing business models. D. Pritchard and A. MacPherson, pp 327-334.

JETS

A PIV investigation of the characteristics of micro-scale synthetic jets. F. Guo and S. Zhong, pp 509-518.

A static compressible flow model of synthetic jet actuators. H. Tang and S. Zhong, pp 421-431.

Application of synthetic jet actuators for the modification of the characteristics of separated shear layers on slender wings. M. Watson, A.J. Jaworski and N.J. Wood, pp 519-529.

Large-eddy simulation of twin impinging jets in cross-flow. Q. Li, G.J. Page and J.J. McGuirk, pp 195-206.

LIGHTER THAN AIR

Performance of non-rigid airships operating in the neutral buoyancy condition. G.E. Dorrington, pp 89-103.

PROPULSION

A numerical study of high pressure turbine forced response in the presence of damaged nozzle guide vanes. L. di Mare, M. Imregun, A.D. Smith and R. Elliott, pp 751-757.

Achieving high parallel performance for an unstructured unsteady turbomachinery CFD code. N. Hills, pp 185-193.

An idea of distributed parameter control for scramjet engines. Y. Daren, C. Tao and B. Wen, pp 787-796.

An unsteady, moving mesh CFD simulation for Harrier hot-gas ingestion control analysis. A.M. Savill, G.A. Richardson and W.N. Dawes, pp 133-144.

Effect of stagnation temperature on supersonic flow parameters application for air in nozzles. T. Zebbiche and Z. Youbi, pp 31-40.

Loss reduction on ultra high lift low-pressure turbine blades using selective roughness and wake unsteadiness. R.J. Howell and K.M. Roman, pp 257-206.

Methods for the design of energy efficient high-speed aerospace vehicles. D. Riggins, T.Taylor, L. Terhune and D. Moorhouse, pp 297-309.

Numerical exploration of starting process in supersonic nozzle. S. Saha and D. Chakraborty, pp 51-58.

Performance characterisation of MPD thrusters. T.R. Nada, pp 443-452.

Scramjets. M. Smart, pp 605-619.

The representation of GT component maps using Mach numbers. V.E. Kyritsis, P. Pilidis and K. Ramsden, pp 453-460.

Towards a full two dimensional gas turbine performance simulator. V. Pachidis, P. Pilidis, L. Marinai and I. Templalexis, pp 433-442.

ROTORCRAFT

Modelling and vibration of a non-classical tilt-rotor wing system. O. Song, H.D. Kwon and L. Librescu, pp 285-295.

Application of a parallel rotor CFD code on HPCx. C.B. Allen, A.G. Sunderland and R. Johnstone, pp 145-152.

Measuring the effect of helicopter rotors on GPS reception. G.J. Brodin, J.A. Cooper and J.R.A. Stevens, pp 561-570.

Modelling the interaction of helicopter main rotor and tail rotor wakes. T.M. Fletcher and R.E. Brown, pp 637-643.

Prediction of aerodynamic forces on a helicopter fuselage. A. Filippone, pp 175-184.

Rotorcraft simulation modelling and validation for control law design. B.J. Manimala, D.J. Walker, G.D. Padfield, M. Voskuijl and A.W. Gubbels, pp 77-88.

Survivability of helicopter with individual blade primary control failure. R. Ganguli, B. Jehnert, J. Wolfram and P. Voersmann, pp 645-657.

SIMULATION

Aircraft flight characteristics in conditions of windshear and icing. Y. Cao and K. Yuan, pp 41-49.

Rotorcraft simulation modelling and validation for control law design. B.J. Manimala, D.J. Walker, G.D. Padfield, M. Voskuijl and A.W. Gubbels, pp 77-88.

STRUCTURES

A study of secondary instabilities in postbuckling composite aerostructures. B.G. Falzon and M. Cerini, pp 715-729.

Analysis of composite plates with variable stiffness using Galerkin Method. E. Senocak and H. Tanriover, pp 247-255.

Development of a parametric-based indirect aircraft structural usage monitoring system using artificial neural networks. S.C. Reed, pp 209-230.

Three dimensional tensile stress concentration in countersunk. A. Bhargava and K. N. Shivakumar, pp 777-786.

SYSTEMS

An optimal-fuzzy two-phase CLOS guidance law design using ant colony optimisation. H. Nobahari and S.H. Pourtakdoust, pp 621-636.

Development of a parametric-based indirect aircraft structural usage monitoring system using artificial neural networks. S.C. Reed, pp 209-230.

Developments in RF simulator technology – approaching the affordable limit. M. Pywell, pp 545-560.

Measuring the effect of helicopter rotors on GPS reception. G.J. Brodin, J.A. Cooper and J.R.A. Stevens, pp 561-570.

The MIL-STD-1553B data bus: What does the future hold? D.R. Bracknell, pp 231-246.

Use of Global Positioning System velocity outputs for determining airspeed measurement error. G.B. Gratton, pp 381-388.

TESTING FACILITIES AND TECHNOLOGIES

A review of some current research on pressure sensitive paint and thermographic phosphor techniques. K. Kontis, pp 495-508.

Design and performance of thin, circular arc, wind-tunnel turning vanes. G. Johl, M. Passmore and P. Render, pp 115-118.

Developments in RF simulator technology – approaching the affordable limit. M. Pywell, pp 545-560.

Experimental and computational study of unsteady hypersonic cavity flows. S. Creighton and R. Hillier, pp 673-688.

Optical imaging techniques for hypersonic impulse facilities. T.J. McIntyre, H. Kleine and A.F.P. Houwing, pp 1-16.

TRAINING

A systems approach to training aeronautical decision making: from identifying training needs to verifying training solutions. D. Harris and W.-C. Li, pp 267-279.

UNMANNED AIR VEHICLES

A proposed reference framework for unmanned aerial vehicle and system airworthiness requirements. A. Maneschijn, T. Jones, T.W. von Backström and L.A. Ingham, pp 335-342.

Addressing pose estimation issues for machine vision based UAV autonomous aerial refuelling. G, Campa, M.R. Napolitano and M. Perhinschi, pp 389-396.

Design of fixed wing micro air vehicles. P. Cosyn, pp 315-326.

High resolution computational unsteady aerodynamic techniques applied to maneouvering UCAVs. S.A. Morton, R.M. Cummings, J.R. Forsythe and K. Wurtzler, pp 397-404.

VIBRATION

Modelling and vibration of a non-classical tilt-rotor wing system. O. Song, H.D. Kwon and L. Librescu, pp 285-295.

WAKES

Modelling the interaction of helicopter main rotor and tail rotor wakes. T.M. Fletcher and R.E. Brown, pp 637-643.

Author Index

ACKROYD, J.A.D.
The Victoria University of Manchester's contributions to the development of aeronautics, pp 473-493.

ALLEN, C.B., SUNDERLAND, A.G. and JOHNSTONE, R.
Application of a parallel rotor CFD code on HPCx, pp 145-152.

ASHFORD, D.M.
New commercial opportunities in space, pp 61-75.

ASHWORTH, M. and BADCOCK, K.J., EMERSON, D.R. and SUNDERLAND, A.J.
High performance computing and computational aerodynamics in the UK, pp 125-131.

BADCOCK, K.J., EMERSON, D.R., SUNDERLAND, A.J. and ASHWORTH, M.
High performance computing and computational aerodynamics in the UK, pp 125-131.

BADCOCK, K.J., NAYYAR, P. and BARAKOS, G.N.
Numerical study of transonic cavity flows using large-eddy and detached-eddy simulation, pp 153-164.

BARAKOS, G.N., BADCOCK, K.J. and NAYYAR, P.
Numerical study of transonic cavity flows using large-eddy and detached-eddy simulation, pp 153-164.

BARBER, T.J., LEONARDI, E., NEELY, A.J. and DOIG, G.
The onset of compressibility effects for aerofoils in ground effect, Technical note, pp 797-806.

BEARMAN, P.W.
A message from the editor, November pp iv.

BEARMAN, P.W., GRAHAM, J.M.R. and ZHU, G.
Prediction of drag and lift of wings from velocity and vorticity fields, pp 699-704.

BHARGAVA, A. and SHIVAKUMAR, K.N.
Three dimensional tensile stress concentration in countersunk, pp 777-786.

BOTEZ, R.M. and ROTARU, M.
Relationships between flying qualities and flight tests parameters for the F/A-18 aircraft, pp 281-282.

BRACKNELL, D.R.
The MIL-STD-1553B data bus: What does the future hold?, pp 231-246.

BRODIN, G.J., COOPER, J.A. and STEVENS, J.R.A.
Measuring the effect of helicopter rotors on GPS reception, pp 561-570.

BROWN, R.E. and FLETCHER, T.M.
Modelling the interaction of helicopter main rotor and tail rotor wakes, pp 637-643.

BUTTERFIELD, J., GIBSON, A., CURRAN, R., CASTAGNE, S., EARLY, J., PRICE, M. and RAGHUNATHAN, S.
Aircraft cost modelling using the genetic causal technique within a systems engineering approach, pp 409-420.

CAMPA, G., NAPOLITANO, M.R. and PERHINSCHI, M.
Addressing pose estimation issues for machine vision based UAV autonomous aerial refuelling, pp 389-396.

CAO, Y. and YUAN, K.
Aircraft flight characteristics in conditions of windshear and icing, pp 41-49.

CASASCO, M. and RADICE, G.
On different parameterisation methods to analyse spacecraft attitude manoeuvres in the presence of attitude constrainsts, pp 335-342.

CASTAGNE, S., EARLY, J., PRICE, M., RAGHUNATHAN, S., BUTTERFIELD, J., GIBSON, A. and CURRAN, R.
Aircraft cost modelling using the genetic causal technique within a systems engineering approach, pp 409-420.

CERINI, M. and FALZON, B.G.
A study of secondary instabilities in postbuckling composite aerostructures, pp 715-729.

CHAKRABORTY, D. and SAHA, S.
Numerical exploration of starting process in supersonic nozzle, pp 51-58.

CHANTHARASENAWONG, C., GALVANETTO, U. and PEIRO, J.
Remarks on the nonlinear dynamics of a typical aerofoil section in dynamic stall, pp 731-739.

CHEN, D.H., WU, W.H., WANG, J.J. and HUANG, Y.
Investigation on the aerodynamic performance on an ejection seat, pp 373-380.

COOPER, J.A., STEVENS, J.R.A. and PRODIN, G.J.
Measuring the effect of helicopter rotors on GPS reception, pp 561-570.

COSYN, P.
Design of fixed wing micro air vehicles, pp 315-326.

CREIGHTON, S. and HILLIER, R.
Experimental and computational study of unsteady hypersonic cavity flows, pp 673-688.

CUMMINGS, R.M., FORSYTHE, J.R., WURTZLER, K. and MORTON, S.A.
High resolution computational unsteady aerodynamic techniques applied to maneouvering UCAVs, pp 397-404.

A PIV investigation of the characteristics of micro-scale synthetic jets, pp 509-518.

HAGGERTY, A., MURMAN, E. and MCMANUS, H.L.
Lean engineering: a framework for doing the right thing right, pp 105-114.

HARRIS, D. and LI, W.-C.
A systems approach to training aeronautical decision making: from identifying training needs to verifying training solutions, pp 267-279.

HILLIER, R. and CREIGHTON, S.
Experimental and computational study of unsteady hypersonic cavity flows, pp 673-688.

HILLS, N.
Achieving high parallel performance for an unstructured unsteady turbomachinery CFD code, pp 185-193.

HOUWING, A.F.P., MCINTYRE, T.J. and KLEINE, H.
Optical imaging techniques for hypersonic impulse facilities, pp 1-16.

HOWELL, R.J. and ROMAN, K.M.
Loss reduction on ultra high lift low-pressure turbine blades using selective roughness and wake unsteadiness, pp 257-206.

HUANG, Y., CHEN, D.H., WU, W.H. and WANG, J.J.
Investigation on the aerodynamic performance on an ejection seat, pp 373-380.

IMREGUN, M., SMITH, A.D., ELLIOTT, R. and DI MARE, L.
A numerical study of high pressure turbine forced response in the presence of damaged nozzle guide vanes, pp 751-757.

INGHAM, L.A., MANESCHIJN, A., JONES, T. and VON BACKSTRÖM, T.W.
A proposed reference framework for unmanned aerial vehicle and system airworthiness requirements, pp 345-358.

JAWORSKI, A.J., WOOD, N.J. and WATSON, M.
Application of synthetic jet actuators for the modification of the characteristics of separated shear layers on slender wings, pp 519-529.

JEHNERT, B., WOLFRAM, J., VOERSMANN, P. and GANGULI, R.
Survivability of helicopter with individual blade primary control failure, pp 645-657.

JOHL, G., PASSMORE, M. and RENDER, P.
Design and performance of thin, circular arc, wind-tunnel turning vanes, pp 115-118.

JOHNSTONE, R., ALLEN, C.B. and SUNDERLAND, A.G.
Application of a parallel rotor CFD code on HPCx, pp 145-152.

JONES, C., DUBS, A., RICHARDSON, T. and LOWENBERG, M.
Dynamic gain scheduled control of a Hawk scale model, pp 461-469.

JONES, T., VON BACKSTRÖM, T.W., INGHAM, L.A. and MANESCHIJN, A.
A proposed reference framework for unmanned aerial vehicle and system airworthiness requirements, pp 345-358.

KHALID, M., WINDTE, J., SCHOLZ, U., RADESPIEL, R. and YUAN, W.
Computational and experimental investigations of low-Reynolds-number flows past an aerofoil, pp 17-29.

KLEINE, H, HOUWING, A.F.P. and MCINTYRE, T.J.,
Optical imaging techniques for hypersonic impulse facilities, pp 1-16.

KONTIS, K.
A review of some current research on pressure sensitive paint and thermographic phosphor techniques, pp 495-508.

KWON, H.D., LIBRESCU, L. and SONG, O.
Modelling and vibration of a non-classical tilt-rotor wing system, pp 285-295.

KYRITSIS, V.E., PILIDIS, P. and RAMSDEN, K.
The representation of GT component maps using Mach numbers, pp 453-460.

LAMBERT, S., MORRISON, J. and DEARING, S.
Flow control with active dimples, pp 705-714.

LE MOIGNE, A., QIN, N. and WONG, W.S.
Parallel adjoint-based optimisation of a blended wing body aircraft with shock control bumps, pp 165-174.

LEONARDI, E., NEELY, A.J., DOIG, G. and BARBER, T.J.
The onset of compressibility effects for aerofoils in ground effect, Technical note, pp 797-806.

LESCHZINER, M.A. and LI, N.
Large-eddy simulation of separated flow over a swept wing with approximate near-wall modelling, pp 689-697.

LI, N. and LESCHZINER, M.A.
Large-eddy simulation of separated flow over a swept wing with approximate near-wall modelling, pp 689-697.

LI, Q., PAGE, G.J. and MCGUIRK, J.J.
Large-eddy simulation of twin impinging jets in cross-flow, pp 195-206.

LI, W.-C. and HARRIS, D.
A systems approach to training aeronautical decision making: from identifying training needs to verifying training solutions, pp 267-279.

LIBRESCU, L., SONG, O. and KWON, H.D.
Modelling and vibration of a non-classical tilt-rotor wing system, pp 285-295.

LOWENBERG, M., JONES, C., DUBS, A. and RICHARDSON, T.
Dynamic gain scheduled control of a Hawk scale model, pp 461-469.

MACPHERSON, A. and PRITCHARD, D.
Strategic destruction of the Western commercial aircraft sector: implications of system integration and international risk-sharing business models, pp 327-334.

MAJUMDAR, A., TOUMI, R., OCHIENG, W., MOLLOY, J., WILLIAMS, V. and NOLAND, R.B.
Reducing environmental impacts of aviation with innovative air traffic management technologies, pp 741-749.

MANESCHIJN, A., JONES, T., VON BACKSTRÖM, T.W. and INGHAM, L.A.
A proposed reference framework for unmanned aerial vehicle and system airworthiness requirements, pp 345-358.

MANGLANO-VILLAMARIN, C.E. and SHAW, S.T.
Three-dimensional indicial response of finite aspect ratio yawed wings, pp 359-371.

MANIMALA, B.J., WALKER, D.J., PADFIELD, G.D., VOSKUIJL, M. and GUBBELS, A.W.
Rotorcraft simulation modelling and validation for control law design, pp 77-88.

MARINAI, L., TEMPLALEXIS, I., PACHIDIS, V. and PILIDIS, P.
Towards a full two dimensional gas turbine performance simulator, pp 433-442.

MCGUIRK, J.J., LI, Q. and PAGE, G.J.
Large-eddy simulation of twin impinging jets in cross-flow, pp 195-206.

MCINTYRE, T.J., KLEINE, H. and HOUWING, A.F.P.
Optical imaging techniques for hypersonic impulse facilities, pp 1-16.

MCMANUS, H.L., HAGGERTY, A. and MURMAN, E.
Lean engineering: a framework for doing the right thing right, pp 105-114.

MOLLOY, J., WILLIAMS, V., NOLAND, R.B., MAJUMDAR, A., TOUMI, R. and OCHIENG, W.
Reducing environmental impacts of aviation with innovative air traffic management technologies, pp 741-749.
